

## More restrictions eased

Water restrictions will be eased from Stage 4 to Stage 1 from 12 noon on Sunday 1 August 2010 for rural customers on Supply Systems 3, 4 and 6 of the Wimmera Mallee Pipeline.

“This will bring these customers in line with all other pipeline supplied customers who have been on Stage 1 water restrictions since October 2009”, said GWMWater Chairman Barry Clugston.

“All pipe laying works have now been completed in these supply systems. A small number of rural customers remain to be connected to the Wimmera Mallee Pipeline and are expected to receive their tapping by the end of July 2010”, he said.

The rural water carting program that has been under way since 2006 will cease as of 1 August 2010.

Information regarding the new restriction levels will be publicised through the local media over the next week.

Further information is also available through the GWMWater website or by calling 1300 659 961.
