

Goroke Sewerage Works Progress

Works to provide Goroke residents with access to sewerage services is progressing well, with Stage 2 of the project being awarded to S&R Engineering and Construction Pty Ltd.

Stage 1 of the Goroke Sewerage Scheme was completed in October 2021 by the same contractor.

Contractor S&R Engineering and Construction will be in Goroke during December 2023 to complete inspection and planning works, as well as surveying the Stage 2 area.

Work on site is expected to commence in late January 2024, with the contractor installing the reticulation network of the STED (Septic Tank Effluent Drainage) system. This network will facilitate the transfer of wastewater from customer's existing septic tanks to Goroke's Wastewater Treatment Plant located on Kiely Street, Goroke.

GWMWater Managing Director Mark Williams said construction of Stage 2 of the scheme would take about five months.

"Depending on weather or any unforeseen delays, we expect works to be completed by the end of May next year," he said.

Goroke customers are required to connect to the Goroke Sewerage Scheme once completed.

"Once Stage 2 has been declared operational, customers will have two years to connect to the sewerage scheme," Mr Williams said.

GWMWater will provide residents in the Stage 2 area with information on how to connect and associated costs as the works progress.

The Goroke Sewerage Scheme provides residents with a reliable, and effective wastewater collection and treatment system, contributing to the prosperity and future growth of the town.
